I am a JavaScript developer with a background in secondary math education. I am passionate about using technology to connect people, empower consumers, and boost civic and social engagement in communities.

Projects

Where Does it Go? | Oct 2018 | <https://github.com/SeattleSorting/recycleApp>
website: helps consumers learn how to dispose of their trash

- Designed and built UI
- Used node.js to create a server and write backend in JavaScript
- Scraped Seattle website to create a JSON file to seed database
- Wrote search functionality to match results from API to item in database

Best Books | Oct 2018 | <https://ch-hi-booklist.herokuapp.com>
website: allows users to search, save, and sort books

- Wrote server paths to navigate pages on site
- With partner, wrote code to search API
- Wrote code to save and delete a book in database

Earthquake Update, Sep 2018 | <https://hingham.github.io/earthquake>
website: displays recent earthquakes on a global map

- Designed and built UI
- Added and populated google map popup windows with api data
- Created a news API that shows new articles related to earthquakes
